

Annual Sustainability Report 2026

This report outlines our organization's environmental and social performance over the past fiscal year. Total carbon emissions were reduced by 22 percent year-over-year, primarily through the transition to renewable energy sources at our three largest manufacturing facilities. Water usage intensity decreased by 11 percent, while overall waste diverted from landfills rose to 78 percent, up from 64 percent the prior year.

Workforce and Community Impact

Employee volunteer hours increased by 35 percent, supported by a new paid volunteer time-off policy introduced in the second quarter. The company also expanded its supplier diversity program, increasing spend with minority- and women-owned businesses by 19 percent. Workplace safety incidents declined for the fourth consecutive year, reaching a record low injury rate of 0.8 per 100 employees.

Looking Ahead

For the coming year, the sustainability committee has set a target of carbon neutrality across all owned facilities by 2028, alongside a commitment to eliminate single-use plastics from all packaging by the end of next fiscal year.
